

LAB 1 SOLUTION DOCUMENT

Course: Cloud Computing (CC-F26)

Section: BSE-V-A

Instructor: Prof. Waqas Saleem

Date: September 13, 2026

STUDENT INFORMATION

- **Student Name:** Laiba Amjad
- **Registration Number:** FA24B1-SE-021
- **Course Code:** CC-F26
- **Section:** BSE-V-A
- **GitHub Username:** laibaamjad065

Task 1: Create and Configure Your GitHub Account

This task verifies the setup of the primary GitHub account used throughout the course.

Evidence 1.1: GitHub Profile

Caption: Screenshot showing public GitHub profile for user laibaamjad065.

Evidence 1.2: GitHub Actual Name Field

Caption: GitHub public settings page displaying complete actual name 'Laiba Amjad'.

Task 2: Register in the Student Marks Portal

This task documents registration on the official Student Marks Portal using GitHub OAuth.

Evidence 2.1: Portal Login Page

Caption: Initial landing page of the Student Marks Portal showing GitHub Sign-In option.

Evidence 2.2: Portal GitHub Profile Link

ID

Complete registration

Enter your registration number, course and section.
The enrollment requires approval.

Registration number

2024-BSE-021

Allowed: 2024-BSE-01 to 2024-BSE-99.

Course

SE-665 — Cloud Computing

ENROLLMENT STATUS

Your courses

Cloud Computing (SE-665) Section A

Waiting for administrator approval

Pending approval

Caption: Portal dashboard confirming course enrollment submission for CC-F26, Section BSE-V-A.

Task 3: Download VMware Workstation Pro and Ubuntu Server

Verification of hypervisor installation, ISO download, and host machine disk capacity.

Evidence 3.1: VMware Workstation Pro Status

Caption: VMware Workstation Pro running on Windows host machine.

Evidence 3.2: Ubuntu Server ISO Verification

Caption: Downloaded Ubuntu Server 24.04 LTS ISO file in local storage directory.

Evidence 3.3: Storage Availability

Caption: Host storage drive showing sufficient free disk space allocated for VM creation.

Task 4: Create the Ubuntu Server Virtual Machine

Step-by-step setup of the Virtual Machine hardware parameters within VMware.

Evidence 4.1: VM Creation Wizard

Caption: Opening screen of VMware Virtual Machine Creation Wizard.

Evidence 4.2: Typical Configuration Selection

Caption: Selection of Typical (recommended) VM configuration option.

Evidence 4.3: ISO Mount Selection

Caption: ISO path pointing to the downloaded Ubuntu Server image.

Evidence 4.4: VM Hardware Summary

Caption: Final configuration summary window showing CPU, RAM, and Disk allocations.

Evidence 4.5: Initial Boot Screen

Caption: Ubuntu Server GRUB boot loader screen upon initial VM power-on.

Task 5: Choose the Installation Language

Evidence 5.1: Language Selection

Caption: Selecting English as the default installation language for Ubuntu Server.

Task 6: Configure the Keyboard Layout

Evidence 6.1: Keyboard Layout

Caption: Setting English (US) as primary keyboard layout.

Evidence 6.2: Keyboard Variant

Caption: Confirming English (US) variant configuration.

Task 7: Choose the Ubuntu Server Installation Type

Evidence 7.1: Installation Type

Caption: Selecting standard Ubuntu Server installation profile.

Task 8: Configure the Network

Evidence 8.1: Network Interface Detection

Caption: Installer detecting primary network interface ens33.

Evidence 8.2: DHCP Address Assignment

Caption: Successful automatic IPv4 address assignment via DHCP.

Task 9: Configure Storage

Evidence 9.1: Guided Storage Setup

Caption: Choosing guided storage layout utilizing entire virtual disk.

Evidence 9.2: Storage Summary

Caption: Reviewing overall storage layout before disk allocation.

Task 10: Select the Installation Disk

Evidence 10.1: Disk Selection

Caption: Selecting target VMware Virtual Disk for installation.

Evidence 10.2: Disk Size Verification

Caption: Verifying virtual disk size matches allocated capacity (20GB+).

Task 11: Review the Partitions

Evidence 11.1: Partition Scheme Layout

Caption: Detailed view of root (/) and boot partition assignments.

Task 12: Confirm the Storage Changes

Evidence 12.1: Storage Destructive Action Warning

Caption: Installer confirmation dialog warning about writing changes to disk.

Evidence 12.2: Execution Confirmation

Caption: Selecting 'Continue' to initiate disk formatting and partitioning.

Task 13: Configure the Ubuntu Profile

Setting up system administrative account identity.

Evidence 13.1: Actual Name Setup

Caption: Profile configuration screen entering 'Laiba Amjad' in Your Name field.

Evidence 13.2: Server Hostname Setup

Your servers name:

The name it uses when it talks to other computers.

Caption: Setting system hostname as ubuntu.

Evidence 13.3: System Username Setup

Pick a username:

Caption: Setting system username to match GitHub username laibaamjad065.

Evidence 13.4: Completed Profile Summary

Profile configuration [Help]

Enter the username and password you will use to log in to the system. You can configure SSH access on a later screen, but a password is still needed for sudo.

Your name:

Your servers name:
The name it uses when it talks to other computers.

Pick a username:

Choose a password:

Confirm your password:

[Done]

Caption: Complete user profile setup screen prior to system installation.

Task 14: Complete the Software Installation

Evidence 14.1: Software Extraction Progress
